

## SAILOR® FleetBroadband

- a step into the future!

SAILOR FleetBroadband is the new benchmark for broadband Internet at sea and standard IP applications. Thrane & Thrane has developed two terminals with different dimensions and capabilities:

- **SAILOR® 500 FleetBroadband**
- **SAILOR® 250 FleetBroadband**

### New opportunities

The increased bandwidth and full Internet access provides exciting new opportunities, making SAILOR FleetBroadband ideal for:

- Increasing **crew welfare**
  - Email
  - Phone calls
  - News from home
- Improving **operational efficiency** – without increasing maintenance costs
  - ECDIS update
  - Software download
  - Vessel/engine telemetry
- Enhancing the use of **commercial applications**
  - Damage assessment video, photos and reports
  - 24/ connectivity to company network
  - On-line procurement
- Strengthen **security**
  - Off-the-self cameras for surveillance

With the launch of SAILOR 500 and 250 FleetBroadband state-of-the-art technology is now available at affordable prices.
